

AP-2000 Air Pillow Machine

Introducing the iCushion AP-2000 Air Pillow Machine... Small Footprint! Low Impact! Big Value!

Whoever said that big things come in small packages was right!

The iCushion™ AP-2000 is a tabletop air pillow system that has a small footprint so it is perfect for limited spaces or in low demand packaging areas. Yet it is still a powerful machine that produces air pillows at a line speed of 25 feet per minute so there is no waiting in this line!

Plus, there is no messy clean up afterwards, as is often found when smaller packaging areas are forced to use alternative cushioning methods.

The AP-2000 proudly runs the iCushion™ Oxo-Biodegradable Air Pillow film so that users can feel confident that they are lowering their impact on the environment with this environmentally preferred product.

Proudly running LILI™ Approved iCushion™ Oxo-Biodegradable Air Pillow Film!

Oxo-biodegradable polyethylene film contains an additive that initiates chemical breakdown more quickly and completely in the presence of oxygen and heat or UV light. Also recyclable and reduces litter impact.

- 8" x 8" Resource #: AP120-BIOD82000
- 8" x 4" Resource #: AP120-BIOD42000
