

PRODUCT DATA SHEET

Product: #124 --- Computer Stencil

Description: **Medium Tack / Light Blue Liner.** Same construction as #123 Stencil. Designed for precision cutting in **Slot-hole pattern** cutters. The tractor-feed holes are punched through both rubber and liner. The 15" width will track and process on both IBM and Gerber pattern cutters. The 30" width will fit only Gerber #750 plotter machines. The inner sheet of polyester maintains alignment of cut designs during transfer from plotter to stone. #124 is designed and recommended for single-process shaped carving on polished granite or marble.

Nominal Values:

Adhesive	Medium Tack / Rubber
180° Adhesion to Steel (oz/in of width) PSTC-1	25
Tensile Strength (lbs/in of width) PSTC-31	7
Elongation (% at break) PSTC-31	450
Total Thickness (mils) PSTC-33	48

Product

Application: For optimum performance, use with #223 or #333 Stencil Fillers. 30" widths will track only on large pin computer cutters. Replaces #123 in Gerber plotter applications.

Standard

Sizes: 15" and 30" x 10 yards. 30" is also sold in 20 yard length.

Also available #124Y Having a yellow 2.0 mil poly film between the adhesive and rubber layers as an aid in identifying any adhesive residue remaining after exposure to sandblasting.
