

PRODUCT DATA SHEET

Product: #129Y --- Computer Stencil

Description: **Medium Tack / Clear PET Liner.** High quality / durable stencil coated with an advanced rubber based pressure-sensitive adhesive. Designed for precision cutting in **IBM-pattern** cutters. The slot-hole pattern will also accurately track through Gerber 15" and friction-feed plotters. #129Y contains an inner sheet of polyester which retains cut designs during liner removal. This same construction is found in #123, #124, and #154 Stencil products.
Recommended for single-process sandblast carving of granite or marble.

Nominal Values:

Adhesive	Medium Tack / Rubber
180° Adhesion to Steel (oz/in of width) PSTC-1	19
Tensile Strength (lbs/in of width) PSTC-31	6
Elongation (% at break) PSTC-31	600
Total Thickness (mils) PSTC-33	47

Product

Application: For optimum performance, use with #223 or #333 Stencil Fillers. The 30" will not work on large pin computer cutters. Replaces #123 in IBM plotter applications.

Standard

Sizes: 15" and 30" x 10 yards

#129Y Having a yellow 2.0 mil poly film between the adhesive and rubber layers as an aid in identifying any adhesive residue remaining after exposure to sandblasting.
