

**PRODUCT DATA SHEET**

**Product:** #154 --- Computer Stencil

**Description:** **Medium Tack / Light Blue Liner.** High quality / conformable / durable stencil coated with an advanced rubber based pressure-sensitive adhesive. 1/2" **on center hole pattern** designed for **IBM** sprockets. Tractor-feed holes are punched through liner and rubber. The specially treated polyester liner retains cut designs during transfer from plotter to stone. Recommended for single-process sandblast carving of marble and granite.

**Nominal Values:**

Adhesive	Medium Tack / Rubber
180° Adhesion to Steel (oz/in of width) PSTC-1	25
Tensile Strength (lbs/in of width) PSTC-31	7
Elongation (% at break) PSTC-31	450
Total Thickness (mils) PSTC-33	48

**Product**

**Application:** For optimum performance, use with #223 or #333 Stencil Fillers. Replaces #123 in IBM cutter applications.

**Standard**

**Sizes:** 12.75", 14.5", 15", 18.75", 25" and 30" x 10 yards. 25" and 30" widths also manufactured in 20 yard length.

**Also available #154Y** ..... Having a yellow 2.0 mil poly film between the adhesive and rubber layers as an aid in identifying any adhesive residue remaining after exposure to sandblasting.
